ANNOUNCEMENT.

This 1899 directory has been made more definite, fuller, and more valuable as a book of reference than its predecessor, which was published in 1896.

The letters and figures following the occupation of each person show the quarter section on which he resides, the name of his post office following. The number placed opposite the name shows the number of persons in the family. Where the number is 0, it indicates that the person so designated has been counted elsewhere. In the rectories of towns and villages, the post office is omitted, being the same as the name of the town. In the Mt. Ayr directory the block from the court house square is indicated. Thus 1n 2e denotes that the person so designated lives in the first block north and second block east from the square. The townships are given in their alphabetical order, the directory of each town and village directly following that of the township in which it is situated. The directories of villages give the names of persons residing on the town plat of each, except that of Delphos, which includes those whose homes adjoin the village.
